

- NOTES**
- Carpark area to be excavated down to subsoil level. Back filled with suitable material and compacted leaving a gravel finish. Surplus excavated material to form bank to North edge of carpark.
 - Access from road to include a tarmacadam raised area to shed water to ditch.
 - Clear sightlines for 75m in both directions along the road
 - Access and material makeup of surfaces, substrates and ground preparation to be in accordance with that laid out in document 'Access from a Single Track Road, Argyll & Bute Council Operational Services 2008: Drawing No SD 08/004'
 - A paved surface, such as a car park, of less than 200 m² is unlikely to contribute to flooding problems, and would be designed to have free-draining run off in accordance with clause 3.6.6.
 - Disabled bay provided with at least 1m manoeuvring width adjacent to bay.
 - 6.4m turning space in line with Parking Design Standards
 - 1m high stock fence separating carpark bays 1 to 5 and woodlands path
 - Remove some shrub vegetation
